Private Label

Send us your logo and we will customize your valve order! All certifications and warranties still apply to any product you private label. Minimum order quantity is 250 pieces with a one time set-up fee and additional charge per valve. Extra fees may apply if your order is below the minimum.

Oxygen Cleaning

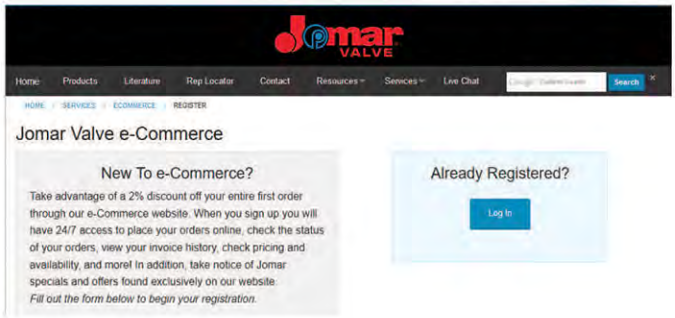
Jomar offers on-site ultrasonic cleaning of our products for use in medical oxygen services.

NFPA 99C states that materials for use in medical gas piping must be cleaned, plugged, capped and bagged until installed.

This process removes hydrocarbons (typically a grease or oil type substance) and other readily oxidizable materials using an ultrasonic cleaning device. Our oxygen cleaning process intends to remove all traces of contamination tightly adhered or embedded onto solid surfaces.

E-Commerce

Our e-Commerce website enables you 24/7 access to product pricing and availability. You can check on your order status or invoice history at any time along with the ability to place orders directly online. Special savings and deals are also available exclusively for ecom customers! Register online at www.jomarvalve.com/ecom.



Electronic Data Interchange (EDI)

EDI allows customers to electronically transmit orders from their system and cuts down on the amount of time it takes to process orders. It reduces time waiting for acknowledgements, paying for costly errors and endless amounts of paper work and manual labor. EDI can fulfill your order quickly and offers the flexibility and functionality that your company deserves.

With Jomar EDI, you can transmit the following documents:

- 810 - Invoice
- 850 - Purchase Order
- 855 - Purchase Order Acknowledgement
- 856 - Advance Ship Notice
